AIS Announces New Display Technology Partnership

Airport Information Systems Limited (AIS) is pleased to announce that it has been appointed by Cello Electronics (UK) Limited as the exclusive distributor of its "Smart TV's" within the airport marketplace.

The Smart 4K HDR LCD TV's offer excellent price performance as flight information displays available in 22", 32", 43", 50", 55", 65", 75" and 85" sizes. Each unit has multiple HDMI and USB connections and comes with a minimum one-year warranty.

Prices range from under £200 for 32" to under £1,900 excluding VAT and delivery for 85" models.

Rick Goold, AIS Managing Director commented that the Cello 4K Smart TV displays gives Airport Information Systems an excellent product to run its FIDSNET software and reduce the overall cost of a display system.
